Discussion:

Wetland and Wetland Buffers:

The site contains no wetland habitats as defined by the San Diego County Resource Protection Ordinance. The site does not have a substratum of predominately undrained hydric soils, the land does not support, even periodically, hydric plants, nor does the site have a substratum that is non-soil and is saturated with water or covered by water at some time during the growing season of each year. Therefore, it has been found that the proposed project complies with Sections 86.604(a) and (b) of the Resource Protection Ordinance.

Floodways and Floodplain Fringe:

The project is in compliance. The project is adjacent to the Upper San Diego River floodway/floodplain fringe area, but there are no proposals for any offsite uses or improvements that need compliance with the Resource Protection Ordinance.

Steep Slopes:

Slopes with a gradient of 25 percent or greater and 50 feet or higher in vertical height are required to be placed in open space easements by the San Diego County Resource Protection Ordinance (RPO). There are no steep slopes on the property. Therefore, it has been found that the proposed project complies with Sections 86.604(e) of the RPO.

Sensitive Habitats:

No sensitive habitat lands were identified on the site. Therefore, it has been found that the proposed project complies with Section 86.604(f) of the RPO.

Significant Prehistoric and Historic Sites:

It has been determined that the property does not contain any archaeological/ historical sites. Therefore, it has been found that the proposed project complies with Section 86.604(g) of the RPO.
